

“The ROI is phenomenal and it helped us achieve a lasting peace of mind”

40% of workers waste as much as 30 minutes each day looking for a suitable meeting space. With a meeting room management system in place, your employees can easily find and book available meeting rooms, leading to increased productivity and efficiency in the workplace.

## What makes Joan the best meeting room management solution

### Efficient space management

Joan displays sync with your company calendar to show the meeting room's availability in real-time, eliminating double bookings and meeting interruptions.

### Analytics

See which meeting rooms are the most popular and how long meetings typically last to better understand how your meeting rooms are used and identify opportunities for optimization.

### Cost-effective

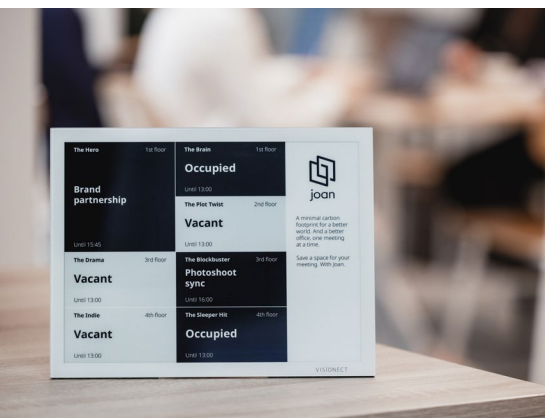

Reduce the administrative burden and make better use of your team's time and resources instead of searching for a space to collaborate.

### Battery-powered

No cabling or wiring. No additional investment into infrastructure is required.

### Energy-efficient

Advanced ePaper technology allows a battery life that lasts months on a single charge. With over 580 times greater energy efficiency than tablets, Joan devices have almost no effect on your electricity bill.

### Unified workplace management system

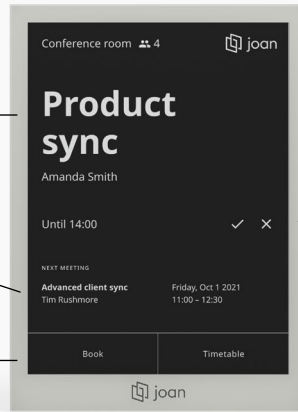

Joan offers a variety of workplace management solutions including desk sharing, asset reservations, visitor check-in and wayfinding signage. As your company's needs grow, Joan scales with you to provide the necessary support for managing your workplace.

Instantly updates with

A clear view of who booked the room for what time.

Reserve the meeting room in advance or on-the-go with one tap on the screen.

The presence checker ensures meetings run smoothly and improves the overall room utilization.

Attach the device to any surface in minutes. No wiring or drilling is required.

### Tim Johnson, Visualsoft

"The main thing it helps us with is removing that kind of friction that you get between employees fighting over space. It makes it very clear, simple, and really cost-effective."
